

Climate Resilience Workshop Agenda

Introduction

What is climate change, and what causes it?

Greenhouse Effect 101

Carbon

- What is it?
- What is its role in climate change?

Local Changes

- Warmer Temperatures + Examples
- More Unpredictable Precipitation + Examples

Effects on Natural Resources

- Soil
- Water
- Air
- Plants

Reducing our Impact: Every Action Counts

- At home
- Going places
- Food choices

Q&A
